

## Topic Hubs

A Topic Hub is intended to provide a topic-specific guide to collected resources about the topic available and accessible from a browser connection to the internet. A Topic Hub provides a web-based guide to the resources specific to a particular subject, i.e., it is a "subject-specific resource guide." Additionally, the guide serves a particular user or set of users, in this case the P2 Specialists and their clients.

Each regional center administers several topic hubs. For example: EMS, Green procurement, household hazardous materials and Pollution prevention are the topic hubs that are being administered by P2RIC regional center.

To see the list of the topic hubs, please visit the following webpage.

<http://www.p2rx.org/P2InfoNexpert/alphabetic.cfm>

The **hubs** table has the list of all the hubs.

Fields

Hub ID	- Unique identifier for each topic hub (PRIMARY KEY)
Topic Hub	- Name of the topic hub
Show up	- The value on this column dictates if the topic hubs are to be listed in index page of topic hubs. If the value is -1, then the topic hub is listed. If the value is 0, the topic hub is being worked on and the status will be changed to -1 once everything regarding the hub is done.
Center_URL	- Lists the URL of the regional center that is administrating the topic hub
Last_Changed	- The value in this column is automatically updated, if something is edited on the contents of topic hub by the administrator.
Last_Remote_Updated	
Status	-
Hub_URL	-

The subsection table of the topic hubs database are populated in regards to topic hub. The following list will provide description of each field.

Hub\_Subsection\_id – the unique identifier for the hub\_subsection table  
(PRIMARY

KEY)

Hub\_ID – SECONDARY ID – shows the relationship with the Hub table

Subsection\_ID – Identifies each subsection for topic hub. Each subsection are given an

unique ID.

1 - Background and overview

2 – Operations

3 – Reasons for change

4 – P2 Opportunities

5 – Table of Contents Text

7 - Table of Contents

8 – Glossary of items

9 - Acknowledgements

10 – Regulatory framework

11 –

12 – Energy Efficiency

13 – Regulations

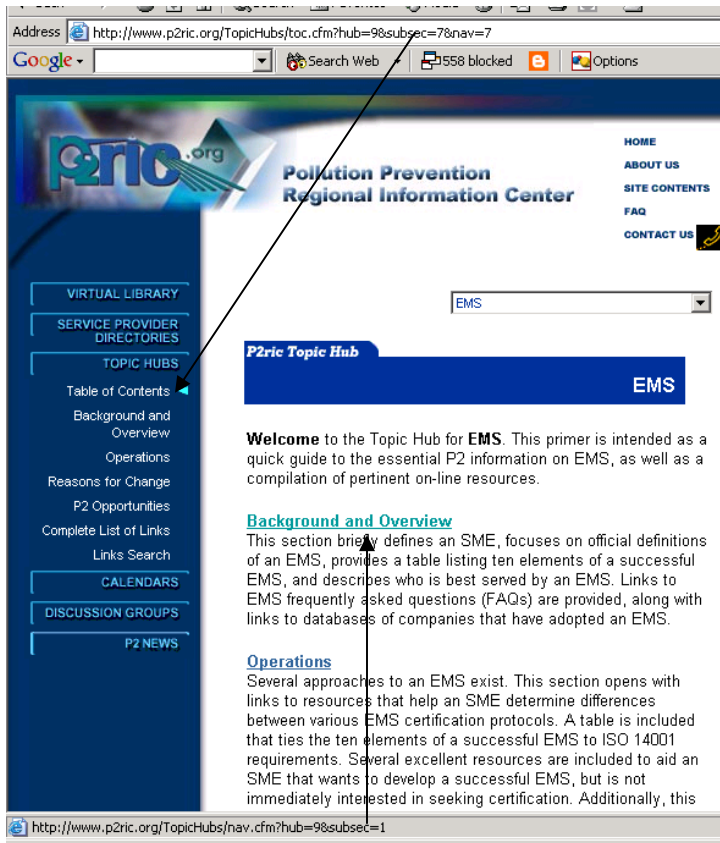

- 14 – Case Studies
- 15 –
- 16 – Key contacts
- 17 – Case Studies
- 18 – Other resources
- 19 – Funding
- 20 – Collection Program
- 21 – Implementing EMA

Each topic hub is associated with different subsection depending upon the regional center.

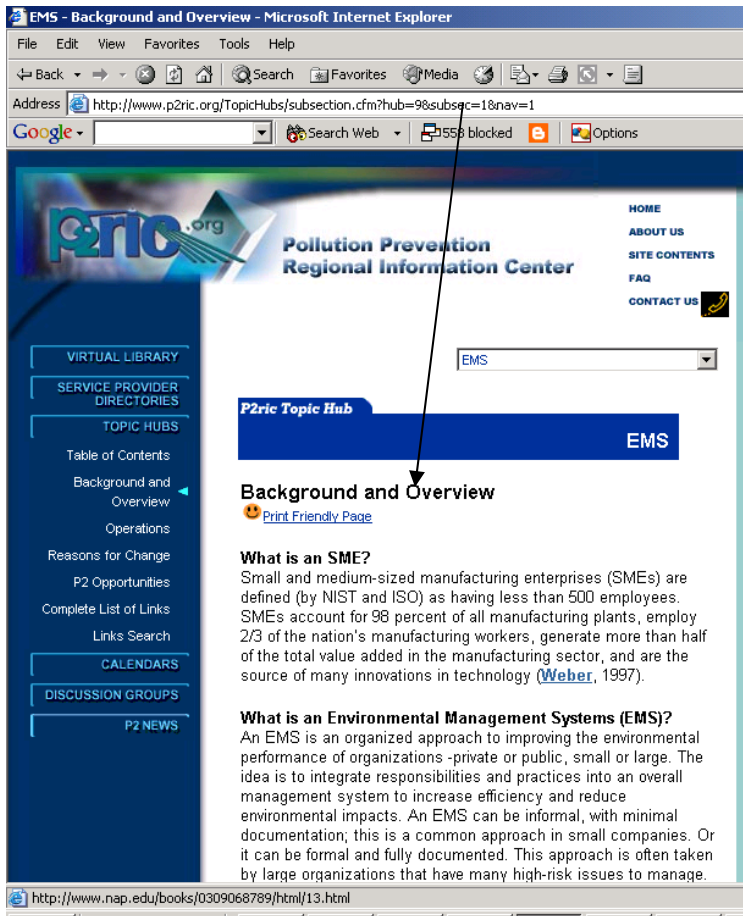

The following picture provides you with the snapshot of the subsection table.

The following figure shows the example of it on the webpage.

In the above figure, subject=7 on the address bar represents the table of contents, whereas if you put your cursor on background and overview link, you should be able to see subsec=1. All the content for the toc webpage are pulled from hub\_subsection table from hub database.

the subsection on the address bar is 1 which represents Background and overview. The information for background and overview is displayed from the URL that has the document. In the above figure, the page resides at <http://www.p2ric.org/topicHubs/text/ems/help.txt> The file is commonly shared between the centers, this is how most of the contents are being shared by all regional centers.
