NEWS!!!

It's never too late
to be up-to-date.

*Set up your own
news aggregator or
republish national
P2 news*

RSS

Are you tired of the e-mail onslaught but don't want to miss out on new funding opportunities or P2 developments, workshops, and regulations?

Why not use **your own personal news page**? You get news items from **only** the sources you identify—and ignore the rest!

You can use one of the many available free services to set up your page. Sites like *My Yahoo*, *My MSN*, *Newsgator*, *My AOL*, and *Google Reader* all use a news aggregator that gives you the power to choose the sources of news you want to see every day.

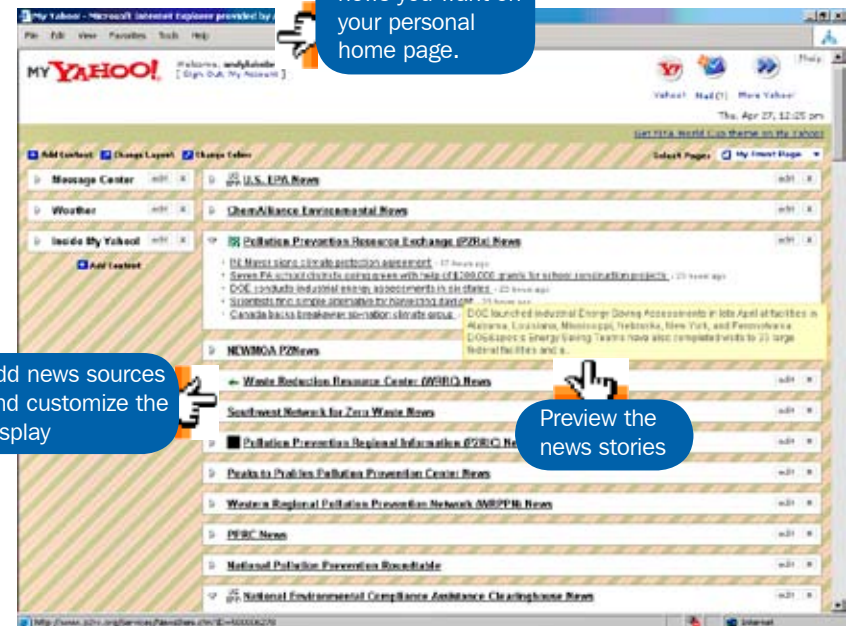

Many newspapers and organizations offer newsfeeds that are used by these free aggregators—look for the **XML** or **RSS** icon on your favorite sites.

Many news sources currently provide their news in RSS format, including:

- All eight P2Rx Regional Information Centers
- EPA
- ChemAlliance
- Environmental Health News
- Environment Canada
- Plus many commercial news outlets—New York Times, BBC, CNN, NPR, USA Today, Washington Post, ABC, and more

RSS **RSS stands for**
REALLY SIMPLE Syndication

RSS technology is cost effective and easy to use.

For more info, go to p2rx.org/services/news.cfm. To learn how to set up your own news page, click on **XML**

Publish our news box on your program's website or get your news published to a wider audience using RSS.

Check out the National P2 News box at P2Rx.org or any regional center website.

Republish the National P2 News box on your website in less than ten minutes!

Or publish *your* news in RSS so that P2Rx and others can broadcast your news to a wider audience.

Find out more at p2rx.org/services/news.cfm
