Andy Bray
P2Rx National Program Manager
NEWMOA
129 Portland Street, Suite 602
Boston, MA 02114

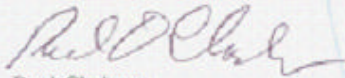

Dear Andy:

The Environmental Compliance Assistance Platform (EnvCAP), operated by the National Center for Manufacturing Sciences (NCMS), would like to expand its partnership with the Pollution Prevention Resource Exchange (P2Rx). EnvCAP and P2Rx have a long history of sharing information on information technology and P2/compliance assistance-related developments. EnvCAP would like to formalize and expand this partnership.

EnvCAP has recently implemented technology that allows for the electronic exchange of data with other assistance provider websites and would like to work with P2Rx to pilot this application. Specifically, EnvCAP would like to explore opportunities for providing state-specific regulatory data to P2Rx so that this information can be integrated into P2Rx sector-specific resources.

EnvCAP would also like to explore opportunities to leverage P2 content developed by P2Rx. We would welcome the chance to work with you on drawing on some of the sector-specific data that might be of interest to the Compliance Assistance Centers.

Sincerely,

Paul Chalmer
NCMS
